Healthcare Risk Management,  
Operational & Regulatory  
Matters

Our lawyers bring great experience, expertise and understanding to the many issues and challenges facing our healthcare clients relative to special and day-to-day corporate and business matters, as well as transactional matters. From physician groups and other providers, to outpatient surgical and imaging companies, pharmaceutical companies, and long-term care facilities, we give clients guidance on corporate governance and compliance, shareholder matters, mergers, acquisitions and divestitures, investments, joint ventures and strategic relationships, debt and equity financing and securities law.

In connection with business transactions, we assess and provide solutions for a broad range of healthcare issues, including contracting, fraud and abuse, self-referral, licensing, change-of-ownership and tax. We also represent a number of private equity funds and advise them, among other things, on regulatory and other risks associated with investments in healthcare companies.
