## RELATED CAPABILITIES

Intellectual Property &  
Technology

# COPYRIGHTS

Copyright law protects works of authorship, such as digital assets on the Internet, music, audiovisual works, software, architectural designs, books, photography, and many others. Whether you are an individual creator or a business owner, we provide counselling on a range of copyright issues related to protection, registration, enforcement, and monetization. We stay up-to-date with the latest developments in copyright law and have a thorough understanding of the complex legal issues that can arise in this area.

## EXPERIENCE

- Represent multiple home builders in securing copyright right in architectural works.
- Represent multiple software providers in registering copyright rights in software.
