DATA PRIVACY AND SECURITY

We counsel clients on a variety of privacy and data security matters in a number of industries. Our experienced attorneys can assist with all aspects of data privacy, including privacy policies, compliance assessments, and data breach response. We have a deep understanding of the General Data Protection Regulation (GDPR), California Consumer Privacy Act (CCPA), and other federal and state privacy laws.

We work closely with clients to establish privacy and data procedures, and we prepare related agreements, documents, and policies in support of these procedures. Examples include terms of use and privacy policies for websites, cloud computing agreements, data sharing and licensing agreements, and many others.
